lighting

Our most popular light, the Aria Forte delivers bright, consistent light across a full-sized part up to 4 pages wide. A full-range dimmer lets you match the light level to the environment and conserve battery power. Forte maintains constant brightness right to the end of the charge.

A status LED blinks to indicate how much charge is left and provide low battery warnings. Rapid USB

recharge provides fast turnaround between events, and it can charge during use. A second side charging port allows bulk charging in stacks or a road case.

Includes a 120-240V USB charger, a nine-foot (2.75 m) cord, and a replaceable high-power lithium polymer (LiPO) battery. One-year warranty. 4 watts.

## Aria Forte Orchestra

All the power of the Aria Forte plus wireless control from your stage lighting console. Using the Forte DMX Transmitter, control brightness of your lights wirelessly from zero to 100%.

## Forte DMX Transmitter

Dim Aria Forte Orchestra lights in up to eight separate banks completely wirelessly from your lighting console. Perfect for movies, blackouts, intimate moments, highlighted sections, or solo performances.

## Charging Road Case

Designed specifically for charging your Aria Forte and Aria Forte Orchestra lights, our charging road cases make your orchestra tours a breeze. Recharge 40, 80, or 100 lights in a single wardrobe-style case.

“The overwhelming feedback from our musicians this season has been very positive about our new Aria lights! And the crew loves that they don’t have to run power for them. So a big win all around. I’m sure this is no surprise to you!”

—Chris Whittemore, Assistant Director of Operations & Production, Oregon Symphony

# Aria Diva

Plug-in  
**performance.**

wall  
powered

even  
lighting

dimmer  
available

Popular in orchestras and ideal for musicians with aging eyes, the Aria Diva delivers the same bright, even light as the Aria Forte. Designed as a replacement for traditional plug-in stand lights, it instantly upgrades music visibility for every musician.

Ten times as bright as incandescent

lights at the bottom of the sheet music, the Aria Diva is designed for people who need a little extra light.

Includes a 120-240V power supply, a 9 ft. (2.75 m) power cord with cord switch, and a one-year warranty. 4 watts.

## Inline Dimmer

Dim your Aria Diva in situations where you don't need as much light. This low voltage dimmer connects between the power supply and your Aria Diva and provides a full range of brightness for your musicians.

## DMX Decoder

Dim up to 30 Aria Diva stand lights using your house lighting console in three banks of ten. Three 35-foot distribution cables are included to distribute power to every stand. Eliminates the need for power strips.

## Road Case

Durable Aria road cases not only store your Diva lights but also have room for your DMX decoders and stage cables. Store 60 or 100 lights in a single wardrobe-style case. Quickly clear the stage and get ready to move.

“After doing a great deal of research on stand lights, I found that several major orchestras use the Aria Diva light. Everyone loved the lights so much that 30 people from the orchestra ordered their own personal lights! Great product and amazing customer service.”

—Nicholas Filzen, Operations Manager, Florida Orchestra
